Beispiele

When data-gathering gets in the way: Georgia laughs and then has to report it. So, is she fully enjoying her cheerful moments as they pop up?

Georgia realized that when she was undecided she felt better if she told someone. So she added that data as further information.

Sammle eine Woche Daten über dich zu einem Thema was dich interessiert (z.B. positive/negative Nachrichten, die am Tag konsumiert werden, Essensverhalten während der Woche,) oder lass dich von einer der folgenden Themen inspirieren.

Mögliche Themen

MY EXERCISE/ACTIVITY ROUTINE

How active are you, and what type of activity do you enjoy the most? From walking to dancing, running for buses, or cleaning the house, it all counts, so make a record of your activity for a week to find out!

MY MUSIC COLLECTION

Is your music collection physical or digital? How much of it do you actually listen to these days? Are certain artists from your past slightly embarrassing? Choose how to define your music collection (all the physical and digital music you own, or all the playlists you have created on a music-streaming platform over a certain amount of time) and begin to count, categorize, and draw.

SMALL TALK

For one day, or for one week (timeframe of your choice), track all of your verbal interactions (with strangers, friends, family, colleagues, ...). Analyze and draw if you enjoyed the conversation, what you talked about, and how significant your conversations were.

MY TO-DO LISTS

List-making is already a form of visual diary.. Let's take it to the next level! For five working days, start each day by writing a to-do list, and divide it into categories (work, study, chores, things I want to do...). At the end of the day rule out what you did, mark the items you decided to discard completely, and leave open what you would move to the next day. At the end of the 5 days analyze your paper and make a data drawing about your week. (p.s. you can also add attributes such as the level of stress that the task caused, or how important or difficult the task was.)

PROCRASTINATION

For five workdays, acknowledge and draw every time you procrastinate. What time of the day is it? What is the task you are dragging around with you? How long did you procrastinate for? Did you do it in the end? Draw a special mark if this exercise of noticing was helpful to get the job done.

SOCIAL MEDIA DETOX

For one day, let's get offline. Try to resist the urge to check social media. Every hour track which social media you actually checked, how many times, and how many times you were able to resist your impulse. Be honest and add notes about your feelings. Were there any positive outcomes? Hopefully!

MY HOLIDAY SOUVENIR

Draw a map of where you traveled, or look at all the photos that you took while on holiday, and categorize according to their information to create a new way of remembering your holiday for posterity!

THE ANIMALS I SEE

What animals (besides your pets) do you notice in your environment? For a week, imagine you are on safari in your own neighborhood, collecting and drawing the different animals you spot.

MY FAMILY

Map out and draw your family relationships, whether you consider your family as blood relatives, good friends, or much-loved pets!

PHYSICAL CONTACT

How many people do you intentionally touch over a day or week, and what does that contact look like (hug, kiss, high five, etc.)? Which of this physical contact is romantic, and which or more businesslike and formal (such as a handshake)?

PRESSURE VERSUS WILL

In one day (or week), track the things you did, the things you felt pressured to do, and the things you wanted to do. What does it teach about yourself? What details can you add to contextualize these actions? Make a data drawing of them.
