Submission via Moodle

16 Points

The following assignments all result in SQL queries for the Steam games database. In your final submission, please provide a .sql file with all the assignments you completed, in the following format:

```
1  -- 01:  
2  SELECT * FROM games;
```

Please make sure to have a **comment** with the **assignment number** and below that the SQL statement(s) for the respective assignment.

Exercise 1 (1 point) Find all games released in 2022 that cost less than \$30. Show the game name, release date, and price.

Exercise 2 (1 point) List all games with *Adventure* in their name, ordered by their release date (newest first).

Exercise 3 (1 point) Find the top 5 most expensive games in the database that support Mac. Show their name, price, and release date.

Exercise 4 (1 point) Calculate the following statistics for all games: average achievements, minimum achievements, maximum achievements, total number of games, and average initial price.

Exercise 5 (1 points) For each year between 2019 and 2022, show the number of games released and their average price.

Exercise 6 (1 points) Find all publishers who have published more than 5 games. Show the publisher name, number of games, and the average price of their games.

Exercise 7 (2 points) List all genres that have an average metacritic rating above 75 (exclude games that have a metacritic score of 0), showing the genre name, average rating, and number of games in that genre.

Exercise 8 (2 points) Find all games that support all three platforms (windows, mac, and linux) Show the game name.

Exercise 9 (2 points) List all developers who have worked with at least two different publishers, showing the developer name and the names of the publishers they've worked with.

Exercise 10 (2 point) Find games that have more genres than the average number of genres per game. Show the game name and its genre count.

Exercise 11 (2 point) For each developer, show their most expensive game and its release date. Only include developers who have games priced above the overall average game price.
