

INTRODUCTION TO GAMES

Game Ideation 01

GAME DESIGN EXERCISE

- Create your own game ideas

THE INITIAL SITUATION: THE FUTURE

- **Your team:** students who want to create a game in one semester
- Small team & you have plenty of other things to do
- In the near future (next lecture), there will be a very important event....

The background is a vibrant blue space scene. It features several stylized celestial bodies: a large purple planet on the left covered in white mathematical symbols, a pink planet with horizontal stripes on the top right, an orange planet with rings on the bottom center, and a blue planet on the bottom left. Thin white lines represent orbital paths, with small colored dots (orange, blue, red) marking specific points. A bright blue star is visible in the upper right, and a yellow comet-like streak is in the bottom right.

GAME DEVELOPERS
CONFERENCE

PITCH YOUR IDEA TO A POTENTIAL „INVESTOR“
WITH SOME CONSTRAINTS...

CHALLENGE ACCEPTED

THE CONSTRAINTS

- Stay in your team
- Small game (development time 3 to 4 months)
- Choose your target group
- Choose your platform (PC, mobile, etc.)

TODAYS' ASSIGNMENT

- Create a game idea based on the constraints
- Create a Wiki page that describes your idea (link from your team site)
- Structure is up to you

NEXT TIME...

- Hagenberg GDC
- Each team will present their ideas to their fellow students
- Presentation: 5 to 10 minutes
- Powerpoint
- Important: Be enthusiastic

THANK YOU FOR YOUR ATTENTION!
