DRAG

Overlap – overlapping regions

No Overlap – no overlapping regions

X-Fade – crossfade at overlap

Shuffle – no pauses (for loop arrangement)

DRAG

during pauses
from/to similar sound signals
to a louder sound signal

CUT

Smooth Cut — pace, tension

Hard Cut — surprise, shock

Crossfade — calm, unnoticed

Crash-Fade (*Sturzblende*) — tension, unease

CUT VS FADE

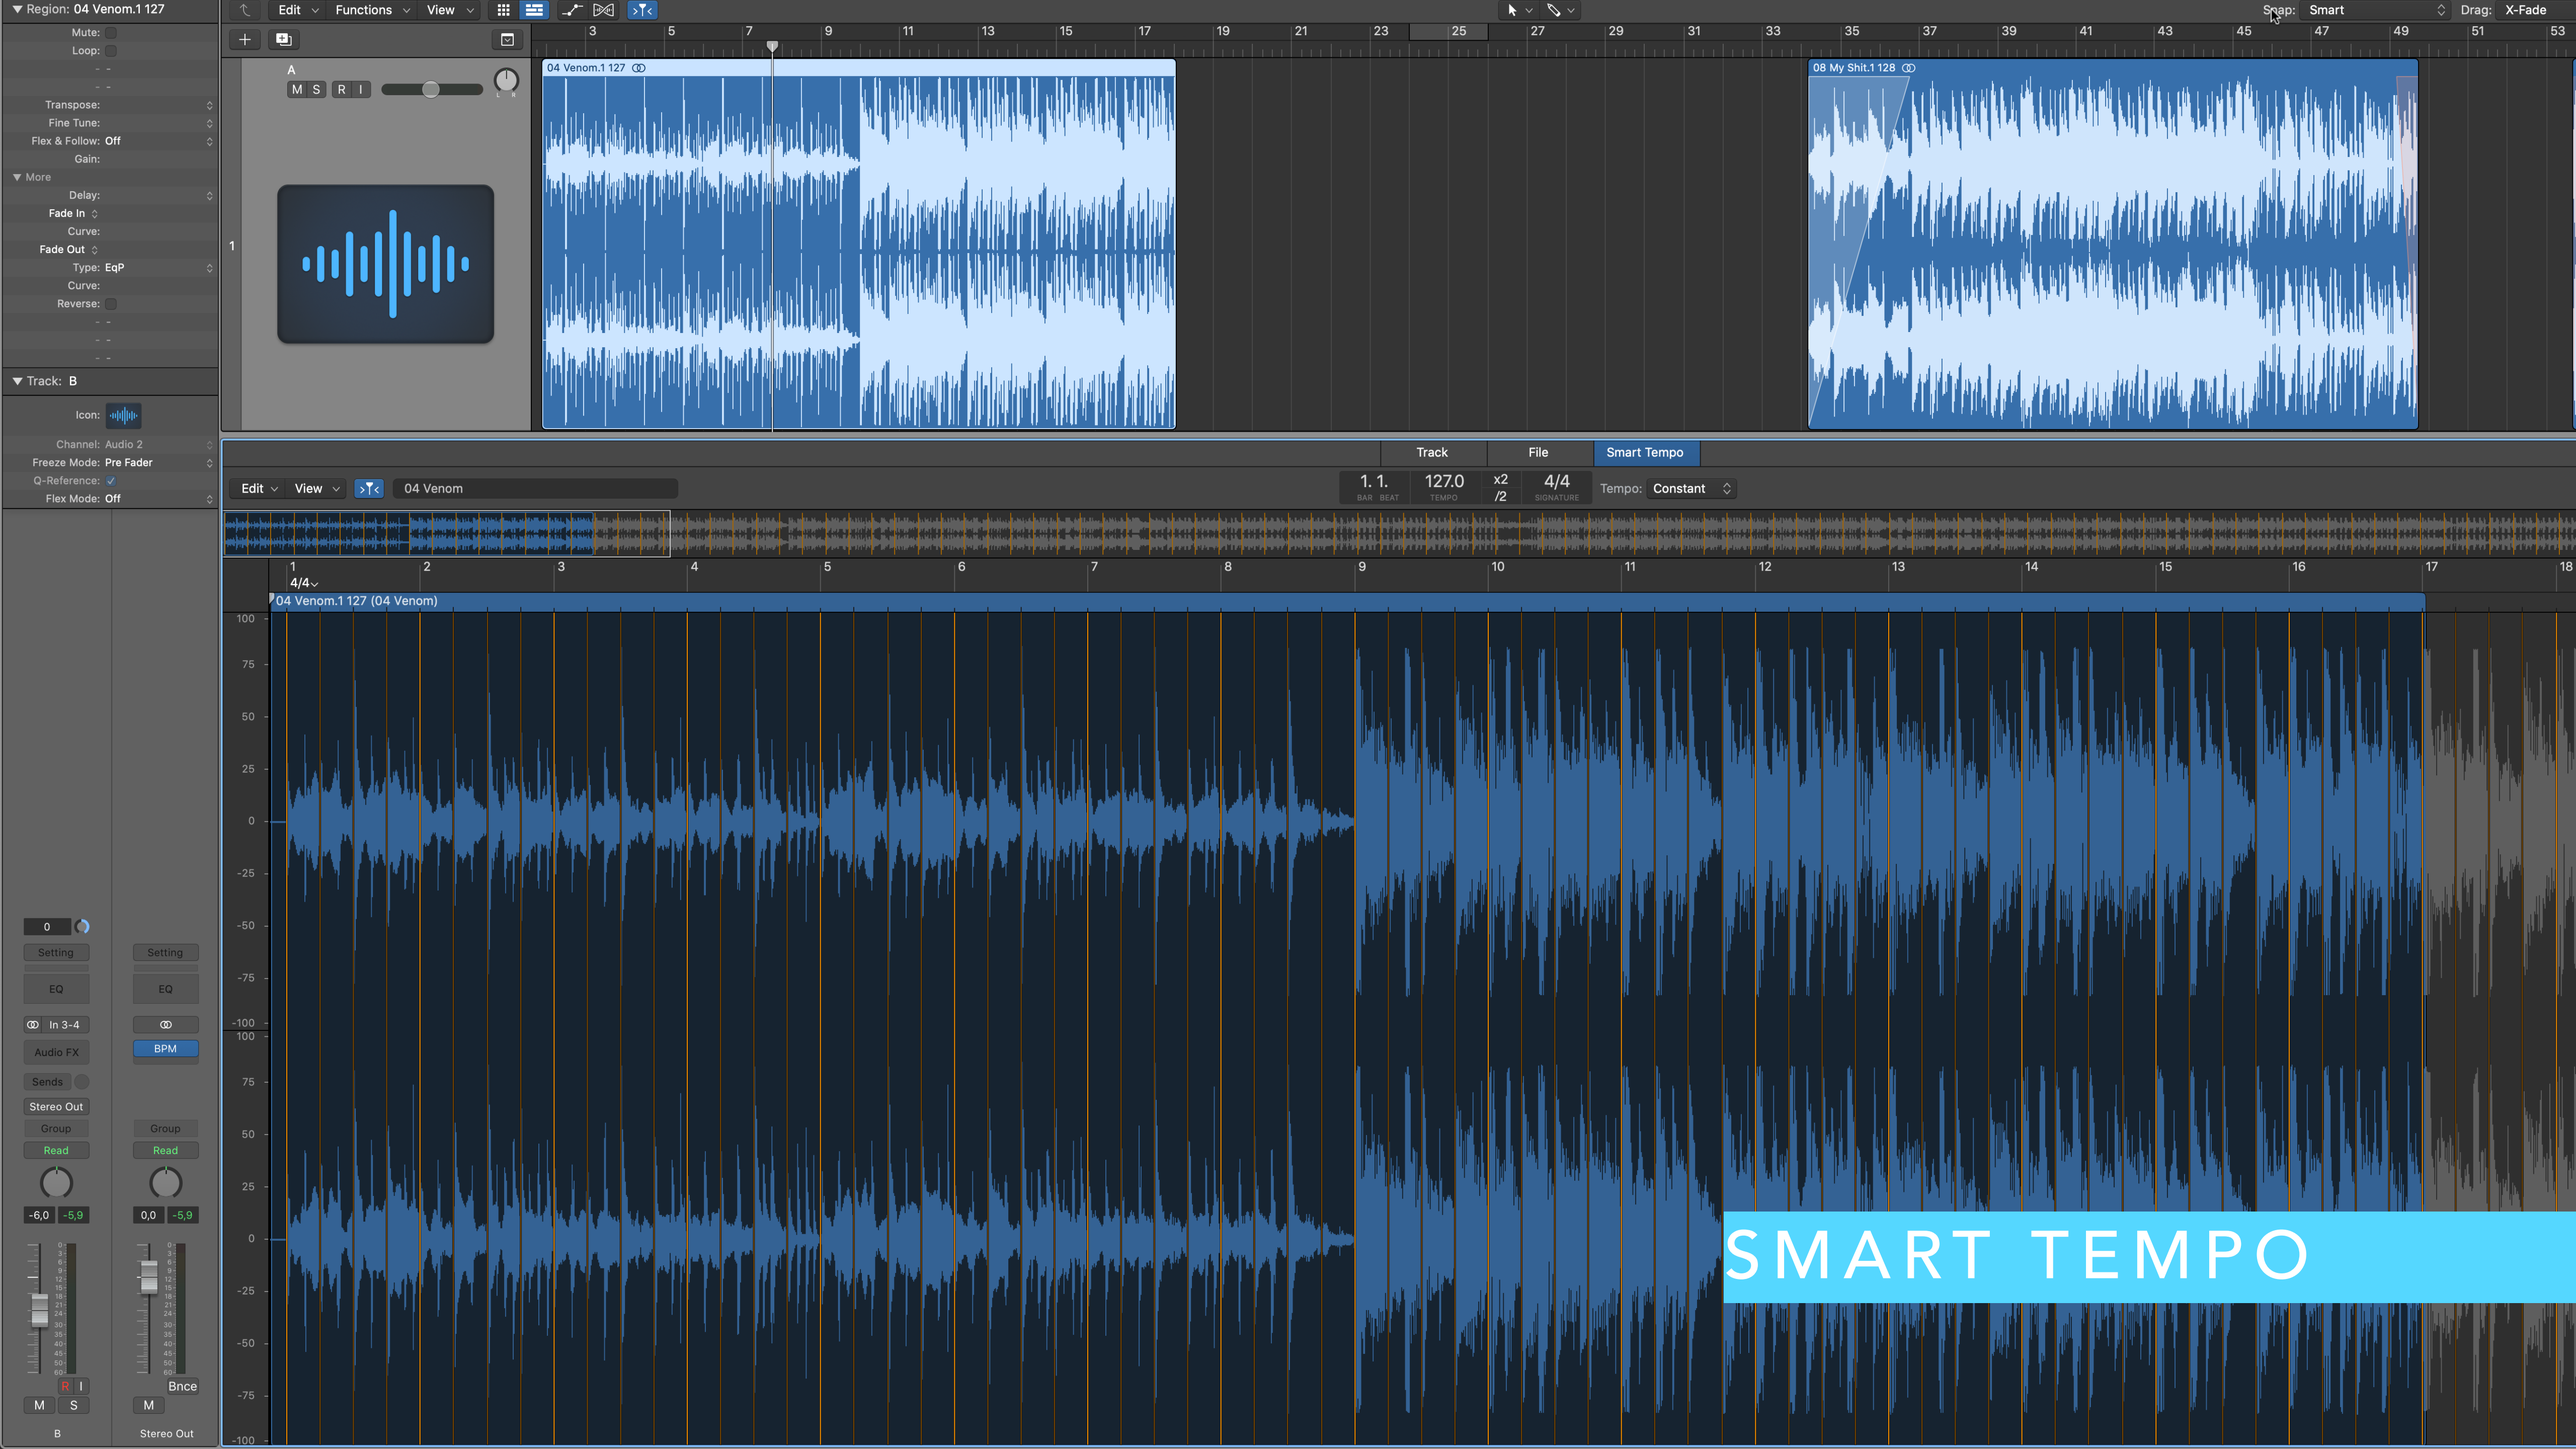

DJ TRANSITIONS

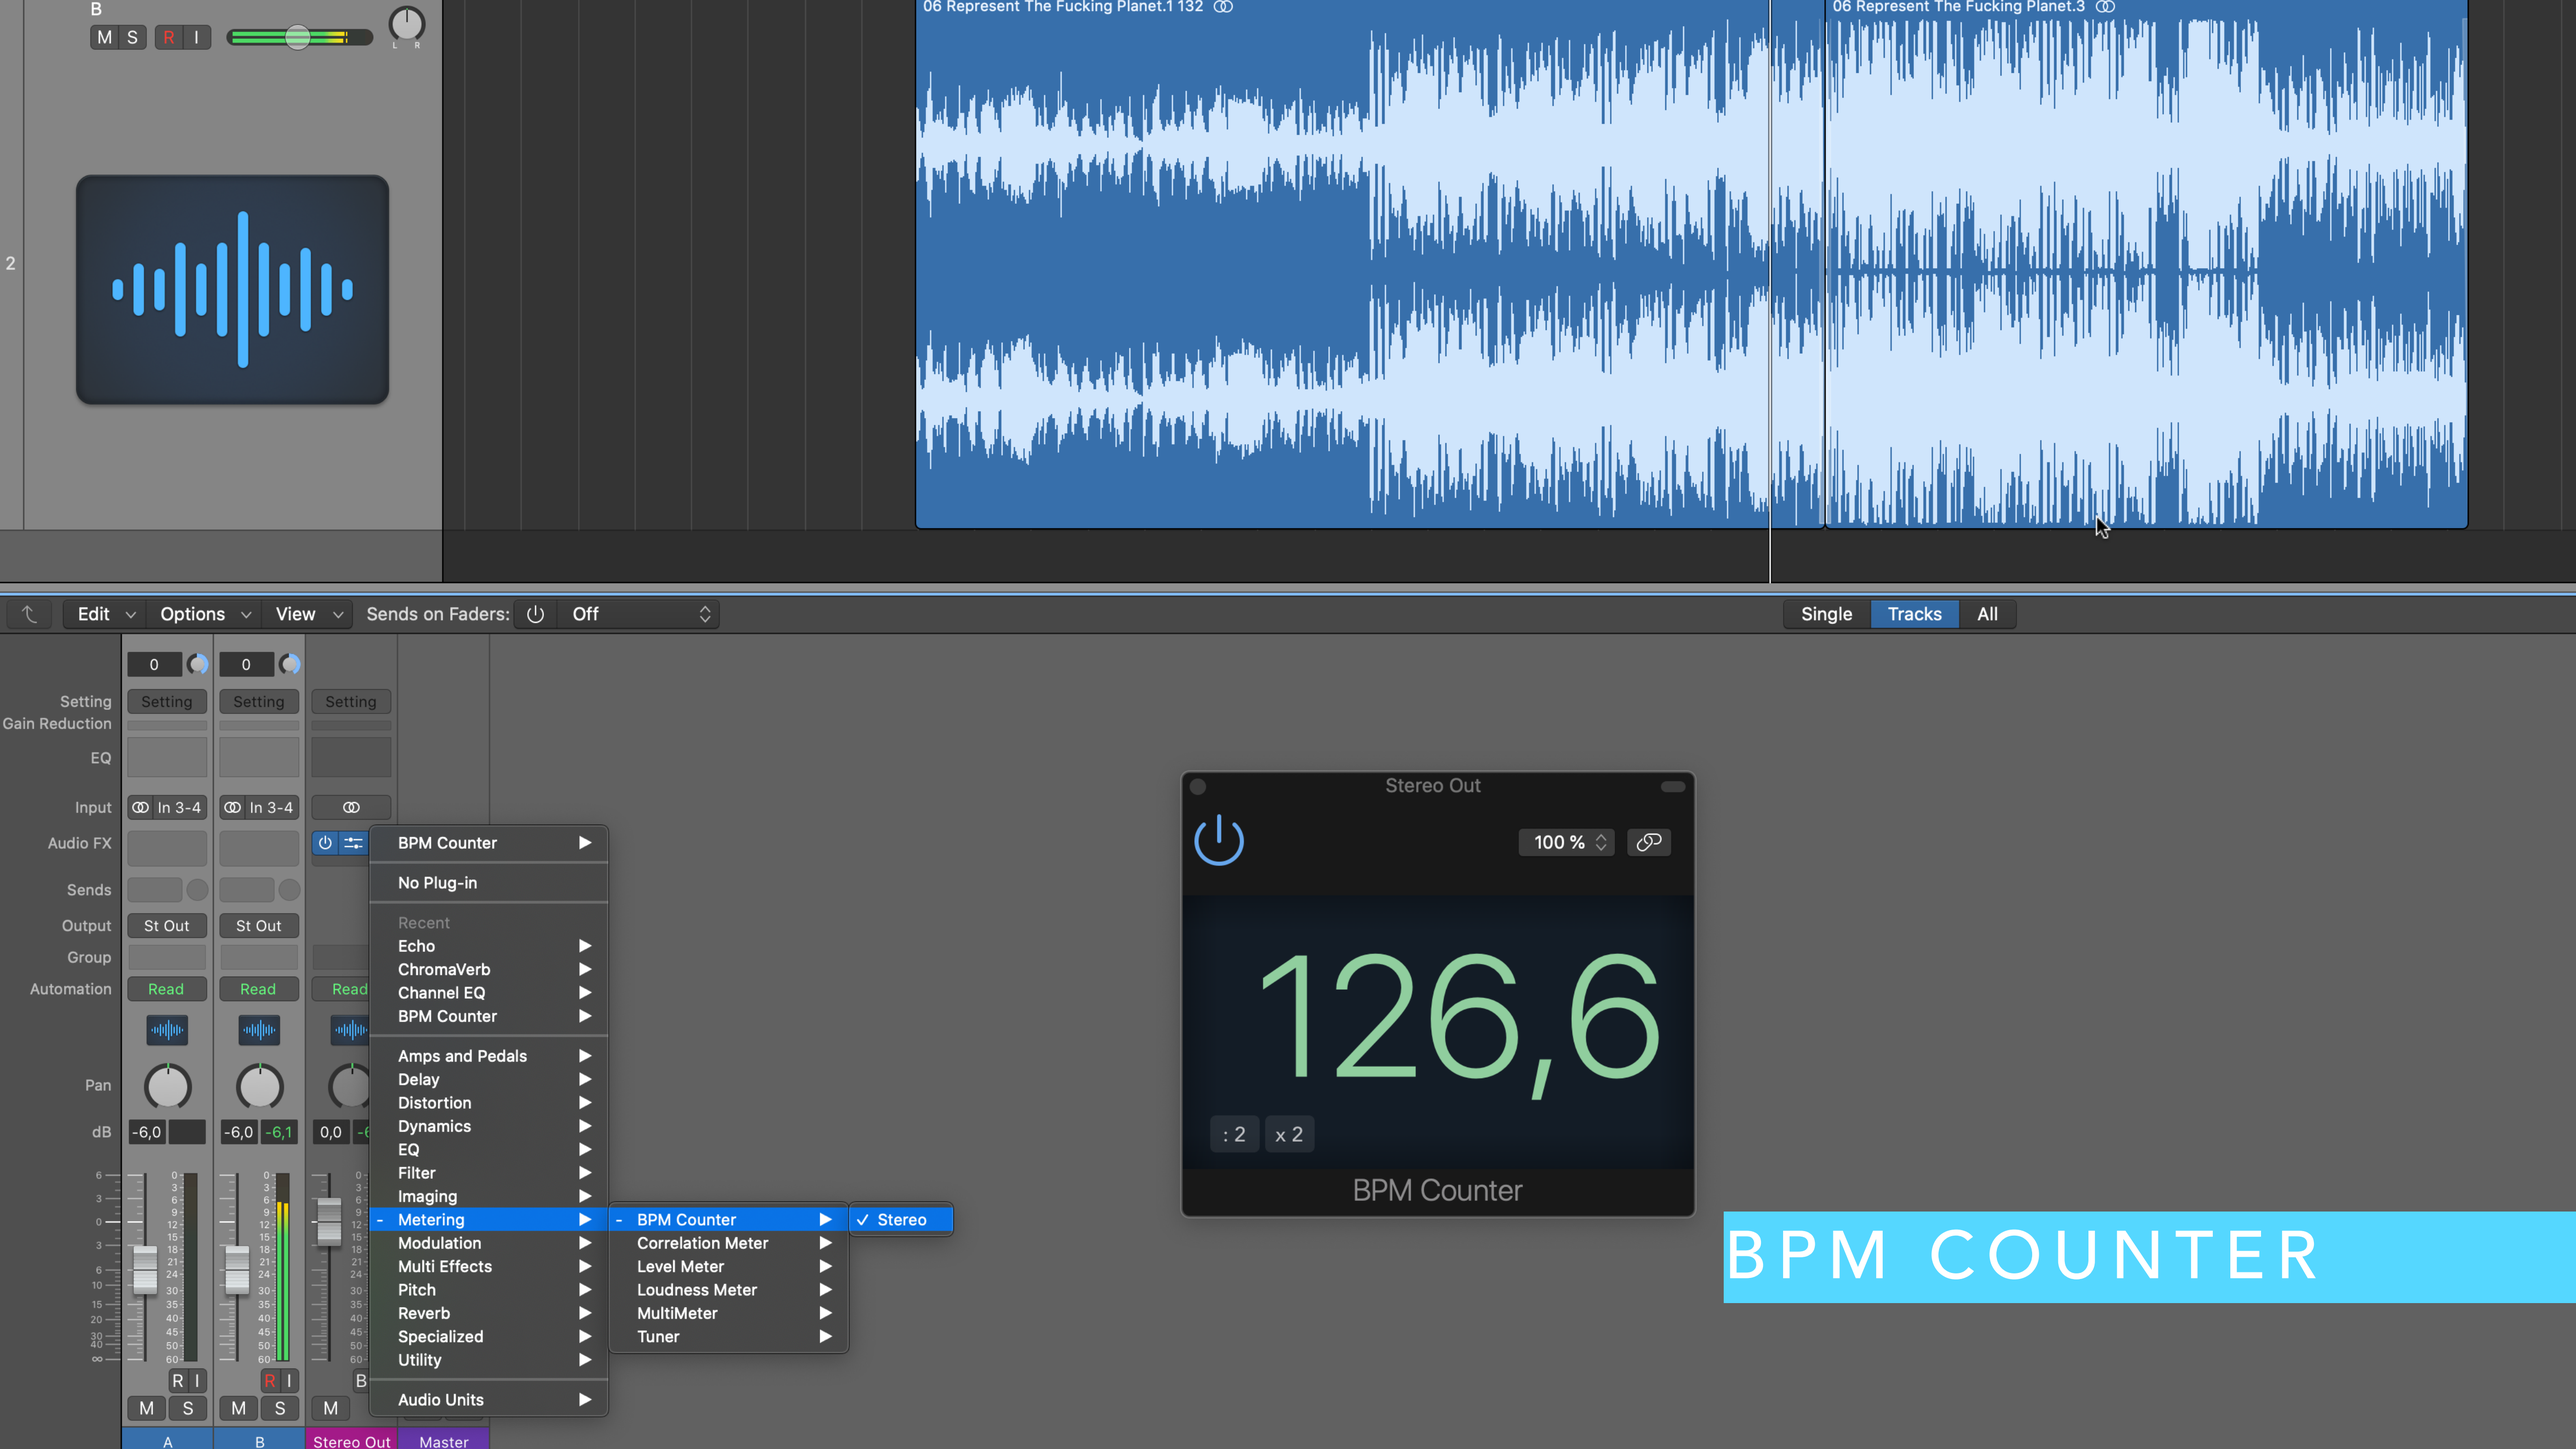

BPM – Beats Per Minute

Editor – Smart Tempo + Analyse

Insert Plug-Ins – Metering – BPM Counter

Timestreching || Pitchshifting

File Editor – Functions – Time and Pitch Machine

Classic – tapemachine/turntable-style

Free – independent tempo/pitch adjustment

TEMPO ADJUSTMENT

Material is played back faster/slower

enter original tempo

adjust using pitch transposition

100 cents = 1 semitone

tempo change calculated in percent and BPM

CLASSIC MODE

depending on the selected algorithm, the material is processed in the frequency domain

= original pitch remains

enter original tempo

enter target tempo

FREE MODE

analyse songs with *smart tempo*

adjust project tempo to average tempo

select *flex* in region inspector

region (=song) automatically

adjust to project tempo
