

APPLIED MOTION-GRAPHICS

MTD.ba SS26

Lisa M. Gierlinger, BSc MA

Lisa Mona

The aim of this course is to independently create motion graphics in After Effects using Lottie extensions to export them as JSON Files, and then build a final prototype project with them.

MTD.ba SS26

Timetable

SUMMER TERM 2026

1. LECTURE

Motion Graphics Intro: Theory, Objectives, Inspiration

16.4.

TEAMS / ELEARNING

For sharing and file storage / submission

1. Exercise block

Animations with After Effects and Lottie export options

2. LECTURE

Web & Smartphone

20.4.

2. Exercise block

Generating Micro Animationen,
Transitions, Looping

3. LECTURE

Game UI Elements

21.4.
28.4.

3. Exercise block

Loading, Achievement, Level
Up, creating Game elements

4. LECTURE

Character Animation

6.5.
7.5.

4. Exercise block

Character Animation in After
Effects and export as JSON

5. LECTURE

Final project

11.5.

5. Exercise block

Concept and first steps for the final project prototype

REMOTE Feedback Session

Final Project Presentation

22.5.

SUBMISSION deadline: 5.6.

Finish!

Grading criteria

FINAL PROJECT

**Concept and Motion Design
for a Gamified Interface**

UI Motion Elements: loading,
transitions, and feedback states

Character Animation

Presentation of the Prototype

100%
of the course grade
